### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Keith Hebron on July 6, 2007.

The application has been amended as follows:

#### **ABSTRACT:**

A mechanical lift system for a truck topper comprising a power lift arm and securing one side of the truck topper to the upper side of the truck bed by a continuous hinge or a series of two or more hinges allowing the truck topper to open 90 degrees and close the truck topper.

26. A mechanical lift system ~~that is designed to open and close a truck topper from its side position by means of hinges and~~ comprising:

a power lift arm;

and ~~is comprised of securing one side of a~~ the truck topper to the upper side of the truck bed by hinge means ~~of a continuous hinge or a series of two or more hinges allowing to~~ allow the truck topper to open 90 degrees and close the truck topper to its original position.

27. The ~~invention is a~~ mechanical lift system as claimed in claim 26 comprising:

a base plate which is secured to the inside bed of a the vehicle;

an upright arm connected to the base plate and secured to the inside portion of the upper rim of the truck bed;

Art Unit: 3612

and a lift arm which is pivotally connected to the upright arm, and follows with other pivotal connections ~~the~~ inside contour of the truck topper to ~~the toppers~~ opposite inside base of the truck topper.

28. The mechanism lift system as claimed in claim 27 ~~the invention has~~ wherein an enclosed heavy duty actuator power unit comprised of:

a ball screw actuator piston which connects to the lift arm via an in line-clevis with a its base housing connected to the base plate with an in-line base clevis;

a 12 volt direct current motor, driving a gear reduction system attached to the encased screw jack piston which lifts and lowers the topper on demand via a reverse polarity toggle switch.

29. The mechanism lift system ~~invention can alternately have~~ as claimed in claim 27 wherein a hydraulic lift arm comprised of:

a hydraulic cylinder piston that connects to the lift arm via an in-line clevis with a the cylinders base housing connected to the base plate with an in-line base clevis;

a hydraulic or electric hydraulic pump, powered by the truck with control valves and lines connected to the hydraulic cylinder.

2. The following is an examiner's statement of reasons for allowance:

The recitations of the specific features of the mechanical lift system in claim 26 including especially the construction of the securing one side of a truck topper to the upper side of the truck by hinge means allowing the truck topper to open 90 degrees and close to an original position is not taught nor is fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
